

# Maintain critical communications with interoperable radio systems and services.

ISD Information Technology Services

## Radio Services

Internal  
Services  
Department

### FEATURES

#### Vehicle and portable radio systems

Supplies, installs and maintains radio systems and equipment for County departments and other outside agencies.

#### Radio systems solutions

State-of-the-art public safety grade radio communications service that is completely interoperable with all current and future systems.

#### Radio system infrastructure support

Support for public safety and general government radio networks of Fire, Sheriff, EMS and Countywide Integrated Radio System (CWIRS)

ISD's Radio Systems services support essential County communications for both every day as well as emergency operations. ISD installs, repairs and maintains both portable and vehicle radio systems for County departments including radios and end user devices such as base stations, consoles, mobile data computers, microphones and other communication equipment.

ISD can provide your organization with assistance in the planning, purchasing and implementation of radio systems and accessories. ISD's Radio services includes:

- Improved communications efficiencies through the use of ISD's CWIRS multi-agency radio system, eliminating the need and expense of building and operating your own radio communications system
- Support of a wide range of both infrastructure and subscriber equipment and accessories
- On-site field service of mobile and fixed radio equipment and accessories

### ISD RADIO SERVICES BENEFITS

#### COST REDUCTION THROUGH CENTRALIZED SYSTEMS

Mountaintop locations and other sites utilize co-located multiple systems to provide Countywide cost savings.

#### SUPPORT FOR RADIO INFRASTRUCTURE

Providing maintenance, installation, troubleshooting and problem resolution for County's emergency radio systems, ISD maintains mission-critical communications to support operations for public safety and other government agencies.

#### INTEGRATION AND COMPATIBILITY OF RADIO SYSTEMS

ISD ensures that your radio system is compatible and fully interoperable within the County infrastructure.

#### SAVE TIME AND MONEY WITH ON-DEMAND SERVICES

Utilizing ISD for radio support and maintenance allows your organization to obtain services as required without the need for time-consuming procurements, supplemental staffing or other contracted technical support services.
